PROFESSIONAL SUMMARY

Software Engineer with ~2 years building enterprise web apps at **Mercedes-Benz R&D India (Angular, React.js, TypeScript, Kubernetes)**, cutting code redundancy by **32%** and keeping test coverage above **95%**. Also builds and ships full-stack AI products independently.

WORK EXPERIENCE

Mercedes-Benz Research and Development India (Bangalore)

Oct 2024 – Jul 2026

Software Engineer(Graduate Apprenticeship Program)

- Built and maintained the **Angular/TypeScript** frontend for an enterprise ECU variant coding platform used by **300+ engineers**, integrating over **30 REST API endpoints** across frontend and backend services.
- Refactored duplicated logic into shared services, reducing redundant code by ~32% and improving maintainability.
- Set up **SSO authentication and Role-Based Access Control** across **8 distinct roles** for secure, granular access.
- Built the project's **GitLab CI/CD** pipeline from scratch and automated deployments to **Kubernetes**.
- Wrote unit tests with **Karma and Jasmine**, keeping coverage above **95%**.

Mercedes-Benz Research and Development India (Bangalore)

Feb 2024 – Sept 2024

Student Intern

- Built responsive UI components in **Vue.js and React.js** for a micro-frontend platform, integrating **6 sub-apps** into one seamless workflow, and owned an entire sub-app spanning half the platform's UI, visualizing **HIL/SIL** test data through bar and pie charts.
- Built test-job tracking and analytics screens for **HIL/SIL** workflows, translating **Figma** prototypes into production-ready interfaces.
- Wrote unit tests with **Jest and React Testing Library**.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** Angular, React.js, Vue.js, REST API Integration, Bootstrap, Micro-Frontends, Webpack Module Federation
- **DevOps & Deployment:** Kubernetes, Docker, GitLab CI/CD, Git, Release Management
- **Cloud, Security & Data:** AWS (EC2), SSO, Role-Based Access Control, PostgreSQL
- **Backend & APIs:** FastAPI, REST APIs, PostgreSQL
- **Testing:** Jest, React Testing Library, Karma, Jasmine, Angular TestBed
- **AI:** FastAPI, TF-IDF & embedding similarity
- **Professional Skills:** Cross-functional collaboration, UX-driven development, Agile workflows, stakeholder communication

PROJECTS

JobFitIQ — AI Resume/Job-Description Match Analyzer

jobfitiq-resume-jd-matcher.vercel.app

React, TypeScript, FastAPI, Claude API

- Built a full-stack match-scoring tool that returns results in under **600ms**, combining **TF-IDF and embedding similarity** across a **140-term, 5-category skill taxonomy**; added debounced, cancellable requests that cut redundant API calls while typing.
- Replaced multi-second waits on AI suggestions with token-by-token streaming, using FastAPI's **StreamingResponse** and the **Fetch Streams API**.
- Added a resume improvement feature that estimates a realistic score gain by re-running the same matching algorithm with flagged skills marked present, instead of relying on an LLM-guessed number.

Wavelength — Full-Stack Music Dashboard

wavelength-music-dashboard.vercel.app

React, TypeScript, Tailwind CSS, Framer Motion, Spotify API, Claude API

- Built a **responsive**, Spotify-inspired **music dashboard** in **React** and **TypeScript**, styled with Tailwind CSS and animated with Framer Motion. It visualizes live listening data and plays full tracks in the browser, and visitors don't need to sign in.
- Built an **AI mood-to-playlist feature**: users type a mood and get a playlist generated from their real listening history across three merged data sources.
- Diagnosed and **fixed 6 production issues**, including a silent serverless crash and two deprecated Spotify endpoints, by testing directly against the live API.

EDUCATION

The National Institute of Engineering, Mysuru

2020 – 2024

Bachelor of Engineering - Computer Science and Engineering

Cumulative GPA: 9.06/10.00

CERTIFICATIONS

- **Google AI Essentials** - Coursera / Google, **Sept 2026**
- **AI Fluency: Framework & Foundations** - Anthropic, **Sept 2026**
- **Claude Code 101** - Anthropic, **Sept 2026**
